

# RC Hi-Lo 850

*Expandable Fall  
Prevention Bed*

## **A fall prevention intervention meeting the highest standards**

Minimizing risk of patient falls can save a facility thousands or even millions in costs and improve the standard of care. The RC Hi-Lo 850 lowers to 9.5" and has total lock and steering lock casters to allow for easy bed movement and facilitate patient transport. The simple to use pull pin system allows caregivers to quickly and easily expand the bed frame's width to accommodate various patient girths and emergency transport through 40" door frames. Unlike most hi-lo beds, the RC Hi-Lo 850 can roll at any height making it safer for the caregivers to move throughout the facility.

Optional Integrated Scale System
