

RecoverAir 3000B

*Low Air Loss, Alternating
Pressure Mattress
Replacement System*

Dual therapy features for advanced wound treatment

The RecoverAir 3000B is a powered bariatric mattress replacement that uses both alternating pressure and low air loss to treat moderate to severe pressure ulcers. Progressive alternating pressure promotes lower interface pressures and increased circulation to stimulate pressure ulcer treatment. Low Air Loss provides moisture and temperature control and improved patient comfort. The top cover is highly vapor permeable and oversized, thus reducing risk of friction, shear and complications of incontinence. As a mattress replacement system, the RecoverAir 3000B can be used with existing patient bed frames.

RecoverAir 3000B *Low Air Loss, Alternating Pressure Mattress Replacement System*

Features

- Available in various widths, 1000 lb capacity
- Provides effective low air loss to assist in moisture control
- Selectable alternating pressure with five minute cycle time
- Maximum Inflate for easy patient positioning
- Quilted top sheet is highly vapor permeable
- CPR quick release for rapid deflation
- Convoluted foam base provides additional safety
- Latex free

Clinical Considerations

- Multiple stage 2, 3 or 4 pressure ulcers
- Contra-indicated for patients with unstable spine conditions

Specifications

- Dimensions
 - Pump: 5" x 10" x 12" (9.5 lbs)
 - Mattress: 39", 42" or 48" W x 80" L x 10" H
- Weight limit: 1000 lbs
- Electrical rating: 120V~, 60Hz, 5A/230V~, 50Hz, 2.5A
- Agency Approvals: UL 2601.1, C22.2; TUV, EN 60601-1
