

RecoverAir 3500

*Low Air Loss Mattress
Replacement System
with Pulsation*

Low Air Loss and Pulsation for outstanding pressure redistribution outcomes

The RecoverAir 3500 combines powered low air loss for moisture control and pulsation for pressure redistribution treatment of moderate to severe pressure ulcers. In the pulsation mode, a caregiver can select one of three cycle settings that continually readjust the pressure to provide alternating pressure and enhanced patient comfort. The RecoverAir 3500 is also standard with an Auto Comfort Mode which allows the caregiver to select optimal pressure based on patient weight. Quiet, portable, lightweight and very reliable, the RecoverAir 3500 is a cost effective mattress replacement system that can be used with existing bed frames.
